

## New ElectroKart Lite

The **NEW ElectroKart Lite** electric golf trolley was designed to deliver to market an affordable trolley with superior quality supported by an exceptional team of technicians ensuring customer piece of mind.

Working with our manufacturing team of technicians, the **ElectroKart Lite** is probably the most competitively positioned product on the market today when measured against price, reliability, build quality and customer support.

We have carefully matched our high specification motors, gearboxes and battery packs to ensure a reliable, powerful but almost silent drive system.

To find out more about the **NEW** ElectroKart Lite take a look around our site or call us direct on **01233 6660000**.

## ElectroKart Lite Specifications

All **ElectroKart Lite** trolleys are assembled using an Aero-Aluminium frame construction, producing a product acclaimed for its robust build quality.

Our trolleys only weigh 7.85 kilos (without the battery) and fold and down in seconds making them lightweight, convenient and compact. When the quick release wheels are detached, the folded footprint is an amazing 81cm (32") X 54cm (21") X 30cm (12") enabling the **ElectroKart Lite** to fit the smallest of car boots.

**Electronic Controls**

**Quick Release  
Wheels**

**Easy to Fold**
